REGULATED ACTIVITIES:

Diagnostic and Screening Procedures
Treatment of Disease
Surgical Procedures

Epsomedical do not see/ treat people less than 18 years of age.

Epsomedical is a provider of adult hospital services predominantly for NHS patients in the mid Surrey area. These include outpatient consultations, diagnostics and treatments including day case surgical procedures.

Epsomedical's primary focus is on patient care and safety, underpinned by strong clinical leadership. However, we have also pioneered the introduction of sophisticated pathway management systems to ensure that our patients receive prompt and reliable services, efficiently delivered. Our guiding principle is that we are always setting higher expectations for patients.

In addition, the company's aims and objectives include:

- Working closely with primary care and other secondary care providers in our locality to ensure good continuity of care, and supporting public health initiatives that apply to our services
- Providing services that follow agreed care pathways using evidence-based practice
- Delivering services that are responsive to the needs of our local communities and in line with the vision of our commissioners
- Providing services that are equitably accessible and are sensitive to different cultural traditions
- Encouraging constructive feedback from patients and staff, and acting on it appropriately
- Respecting the patient's privacy and dignity at all times.
- Respecting the patient's right to confidentiality
- Delivering value for money to commissioners

These ambitions require all staff to understand and endorse our objectives. Our management is dedicated to building a motivated team who feel valued and supported. They encourage them to achieve the aims and objectives relevant to their position, whilst meeting their own personal professional goals. They endeavor to create an environment where staff feel able to discuss and raise concerns without fear of retribution.

Our success in meeting these objectives is reviewed regularly with our commissioners and regulators.

Our clinical governance processes aim to create an environment of openness and readiness to acknowledge errors, while maintaining the highest standards of probity amongst all healthcare professionals.
